Ernesto Camilo Zuleta Suarez, Ph.D.

Curriculum Vitae

eczuletas@gmail.com | Google scholar

PROFILE

Applied energy scientist with university-level engineering teaching experience, a Ph.D. in Energy Science and Engineering, and more than five years of postdoctoral research experience at the University of Tennessee and Oak Ridge National Laboratory. Background in hands-on laboratory instruction, engineering statistics and design of experiments, undergraduate mentoring, instrumentation, measurement, materials characterization, and experimental data analysis. Research interests emphasize applied engineering, energy systems, and laboratory-based problem solving.

EDUCATION

Jan. 2014 - Dec. 2019 | **Ph.D. in Energy Science and Engineering**, The University of Tennessee, Bredesen Center for Interdisciplinary Research and Graduate Education, Knoxville, TN, US.

Jan. 2010 - Jun. 2013 | **M.Sc. in Engineering (Chemical Engineering)**, Universidad de Antioquia, Medellín, Colombia.

Jan. 2000 - Jun. 2007 | **B.Sc. in Agro-industrial Engineering**, Universidad Popular del Cesar, Valledupar, Colombia.

RESEARCH AND WORK EXPERIENCE

Jul. 2023 - Jul. 2026 | **Oak Ridge National Laboratory**, Energy Storage and Conversion Group, Oak Ridge, TN

Postdoctoral Research Associate

- Developed and evaluated sodium hybrid redox flow battery architectures and interfaces through advanced electrochemical diagnostic techniques, including GEIS/PEIS and equivalent-circuit modeling of Na|β''-alumina solid-electrolyte cells, to identify performance limitations, optimize interfacial design, and improve long-term electrochemical stability.
- Synthesized sodium thiophosphate and polysulfide compounds and characterized them by ^{31}P-NMR, UV-Vis, and Raman spectroscopy.
- Performed electrochemical characterization of catholyte materials using cyclic voltammetry, coin-cell, and flow-cell testing for nonaqueous redox flow batteries.

Nov. 2020 - Jun. 2023 | **The University of Tennessee**, Dept. of Chemical and Biomolecular Engineering, Knoxville, TN

Postdoctoral Researcher, Zawodzinski Group

- Evaluated electrochemical performance of organic redox-active molecules in aqueous systems and tested membrane materials in full-cell configurations.
- Applied EPR spectroscopy to study molecular dynamics in deep eutectic solvents.

Jan. 2014 - Aug. 2019 | **The University of Tennessee**, Center for Renewable Carbon, Knoxville, TN

Graduate Research Assistant

- Synthesized and characterized lignin-derived model compounds via catalytic methods; studied reaction mechanisms and catalyst deactivation pathways.
- Performed analytical characterization using HPLC and NMR spectroscopic techniques.

Aug. 2010 - Jun. 2013 | **Universidad de Antioquia**, Medellín, Colombia

Research Assistant

- Developed strategies to mitigate biodiesel corrosivity and its impact on automotive components.
- Improved the oxidative stability and low-temperature flow properties of biodiesel from natural oils.

Jul. 2005 - Oct. 2007 | **Universidad Popular del Cesar, Valledupar, Colombia**

Research Assistant

- Studied the production of epoxidized palm olein via peroxyacetic acid formed in situ.
- Analyzed preparation of activated carbons from carbonaceous precursors of the Cesar bituminous coal basin and agricultural biomass.

AREAS OF TEACHING INTEREST

Materials and measurement systems; engineering experimentation and laboratory methods; engineering statistics and design of experiments; thermal and energy systems; applied data analysis.

TEACHING EXPERIENCE

Jan. 2010 - Dec. 2012 | **Universidad de Antioquia, Faculty of Engineering, Medellín, Colombia**

Lecturer and Teaching Assistant

- Teaching Assistant, Heat Transfer Laboratory (Dept. of Chemical Engineering): conduction, convection, and heat-exchanger experiments; instrumentation, data acquisition, and laboratory report writing.
- Lecturer, Statistics and Design of Experiments (undergraduate Chemical Engineering): hypothesis testing, regression, factorial design, and analysis of experimental data.
- Instructor and statistical consultant, Design and Formulation of Foods (Faculty of Pharmaceutical Chemistry): applied experimental design and formulation optimization.

INVITED PRESENTATIONS

Ernesto C. Zuleta Suarez. "Hydrogen: An Energy Alternative with Many Colors and Shades" ("Hidrógeno: Una alternativa energética con muchos colores y matices"). Invited webinar speaker, Universidad Autónoma de Bucaramanga (UNAB), Bucaramanga, Colombia, Oct. 2023 (virtual)

ORGANIZED SESSIONS AND SYMPOSIA

Organizer, First CRC-CABLE Bioeconomy Seminar, "Bioeconomy in East Tennessee." Center for Renewable Carbon, The University of Tennessee, Knoxville, 2018

MENTORSHIP

2023 | **Research mentor**, The University of Tennessee, Knoxville, TN. Mentored undergraduate researchers in experimental planning, electrochemical characterization, data analysis, and interpretation.

- Hannah K. Davis, undergraduate student.
- Jacob Johnson, undergraduate student.

SERVICE AND OUTREACH

Aug. 2023 - Aug. 2024 | Board member of Oak Ridge National Laboratory Postdoc Association (ORPA)

LEADERSHIP ROLES

Aug. 2023 - Aug. 2024 | Social and Well-being Chair, Oak Ridge National Laboratory Postdoc Association

Aug. 2017 - Apr. 2018 | Student Delegate, Consortium for Advanced Bioeconomy Leadership Education (CABLE), The Ohio State University

PROFESSIONAL DEVELOPMENT

Teaching and Pedagogy

CIRTL Associate Level of Certification. Center for the Integration of Research Teaching and Learning (Online), University of Tennessee, Knoxville, Jun. 2023

Certification in University Teaching. Pontificia Universidad Javeriana, Bogotá, Colombia (Online)., Apr. 2023

Certification in University Teaching and Didactics. Politécnico Superior de Colombia, Medellín, Colombia (Online), Jan. 2023

Technical and Professional Development

Digital Twins and Advanced Simulation in Electrical Systems: Technologies for Planning, Operation, and Risk Management (30 hours). Comité Colombiano de la CIER (COCIER), virtual., Jul. 2026

Shipley Introduction to AI for Proposals course, 2025

Powerful Proposal Writing for Postdocs course, 2025

Leadership

Energy Leaders Training Program (Programa de Formación de Líderes Energéticos), Edition 13, World Energy Academy (39 hours). World Energy Council Colombia, 2021

SPECIALIZED SKILLS

Electrochemistry: Electrochemical impedance spectroscopy (EIS, GEIS, PEIS) and equivalent-circuit modeling; cyclic voltammetry; linear sweep voltammetry; chronoamperometry; chronopotentiometry; galvanostatic cycling; polarization curves; rotating disc electrode and microelectrodes.

Spectroscopy: UV-Vis; FTIR; NMR (^{1}H, ^{13}C, ^{31}P); Raman; Electron Paramagnetic Resonance (EPR).

Separation and analysis: Gas chromatography; HPLC.

CAD: Onshape (working proficiency).

Computation and software: Python, MATLAB, EC-Lab, MestReNova, ChemDraw, Microsoft Office.

PROFESSIONAL SOCIETIES

2024 - present | **The Electrochemical Society (ECS)**, Member.

LANGUAGES

English: professional working proficiency.

Spanish: native.

GRANTS AND AWARDS

2025 | ORPA Best Postdoc in Leadership Award (third place), Oak Ridge National Laboratory

2024 | People's Choice Winner Award, 12th Annual ORPA Research Symposium, TN

2024 | Early Career Poster Session Award, 14th Beyond Lithium-Ion Conference, ORNL, TN

2018 | Bredesen Center Service Award, The University of Tennessee, Knoxville

2017 | Yates Dissertation Fellowship, The University of Tennessee, Knoxville

2015 | Bredesen Center First Authorship Award, The University of Tennessee, Knoxville

2013 | Certificate of Merit for Outstanding Academic Performance and Cultural Contributions, UTK

2013 | Honorable Mention, Master of Engineering, Universidad de Antioquia, Colombia

2013 | Graduate Scholarship, Colciencias (Administrative Department of Science), Colombia

2009 | Award of the School of Engineering, Universidad Popular del Cesar, Colombia

2008 | Young Researcher Grant, Colciencias, Colombia
